

FOR IT & SECURITY

Security and integration

Certified security, where your data lives, how access is controlled, and how the platform connects to your stack.

SECURITY & INTEGRATION OVERVIEW

Security and integration

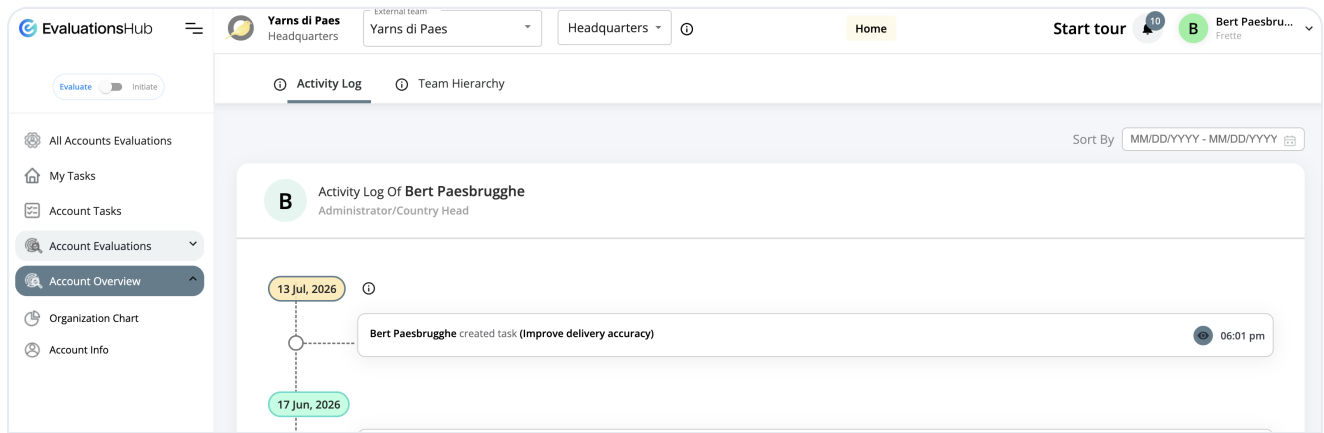

Certified information security, European data residency, and a defined integration path.

Security & compliance

- ✓ **ISO/IEC 27001:2022 Certified**
Independently certified information security management system (certificate included).
- ✓ **GDPR compliant**
Data processing aligned with European data protection law.
- ✓ **EU data residency**
Files and data hosted on AWS Paris (eu-west-3), confirmed in-product by storage on `vockam.s3.eu-west-3`.
- ✓ **Role-based access control**
Granular permissions with a complete audit trail.

Integrations

- ↔ **Native Salesforce sync**
Two-way sync via custom objects.
- ↔ **REST API + webhooks**
Programmatic access and event-driven automation.
- ↔ **CSV / Excel**
Import and export supplier data with no friction.
- ↔ **AWS AppFlow**
Managed connectivity to 40+ enterprise services, including SAP.

Audit trail. Every action is recorded with the user, timestamp, and item: task creation, document updates, member changes, and more. Filterable by date.

Data isolation

Each customer runs on a dedicated environment at a custom subdomain (for example, `yourcompany.evaluationshub.co`), with role-based access control governing every user and action.

A custom DPA and audit support are available for enterprise customers. The ISO/IEC 27001:2022 certificate is included in this pack; its scope explicitly covers EvaluationsHub and InitiativesHub.
